Sales Analysis Interactive Dashboard

A Microsoft Excel Dashboard Report — Sales, Orders, Quantity, Profit, Category, Quarterly and Region-wise Performance Analysis

Presented by

Asrarul Haque

PROJECT OVERVIEW

Objective of the Dashboard

The objective of this dashboard is to analyze sales performance by tracking Sales, Orders, Quantity, Profit, Category-wise Sales, Quarterly Sales, and Region-wise performance. The dashboard enables business users to monitor KPIs and make informed business decisions through interactive filters.

Tool Used	Microsoft Excel
Project Type	Interactive Sales Dashboard
Core Focus	KPI Tracking & Decision Support

WHY THIS DASHBOARD

- Consolidates scattered sales files into one view
- Tracks revenue, profit, orders & quantity in real time
- Breaks down performance by category & region
- Compares quarterly trends for seasonality
- Filters instantly by region, category & year

BUSINESS PROBLEM

Why the Business Needed This Dashboard

Sales data is often spread across multiple files, making it difficult to monitor business performance. The business required a single, interactive tool to consolidate this information and support faster decisions.

1

Track Sales & Profit

Monitor overall revenue and profitability at a glance

2

Monitor Order Volume

Keep visibility on total customer orders processed

3

Analyze Product Categories

Understand which categories drive performance

4

Compare Quarterly Performance

Spot seasonal trends across Qtr 1 - Qtr 4

5

Filter by Region, Category & Year

Slice data instantly for focused analysis

6

Support Faster Decision-Making

Give management a single source of truth

DATASET

Retail Sales Dataset

The dashboard is based on retail sales data with the following fields:

Order ID	**Quantity**
Order Date	**Sales**
Region	**Profit**
Category	**Year**
Product Name	

DATASET SNAPSHOT

171	Total Orders
754	Units Sold
5	Product Categories
4	Regions Covered
3	Years of Data (2020-2022)

Presented by Asrarul Haque

DATA PREPARATION

Data Cleaning & Preprocessing

1. Removed duplicate records
2. Checked and handled missing values
3. Standardized category and region names
4. Verified sales and profit values for accuracy
5. Corrected data types for dates and numbers
6. Organized data into an Excel Table for dynamic reporting

TECHNICAL TOOLKIT

Excel Features Used

- Pivot Tables
- Pivot Charts
- Slicers
- Treemap Chart
- Waterfall Chart
- KPI Cards
- Conditional Formatting
- Excel Tables
- Sorting & Filtering
- Cell Linking
- Number Formatting
- Dashboard Layout Design

DASHBOARD KPIS

Key Performance Indicator Cards

TOTAL SALES

₹18,34,530

Displays the total revenue generated

TOTAL ORDERS

171

Shows the total number of customer orders

TOTAL QUANTITY SOLD

754

Indicates the total units sold

TOTAL PROFIT

₹1,83,453

Measures overall business profitability

Presented by Asrarul Haque

DASHBOARD VISUALIZATION

Quarterly Sales Analysis

BUSINESS INSIGHT

Quarter 3 recorded the highest sales at ₹6,22,120, while Quarter 4 was the weakest at ₹2,94,500. Comparing quarters helps management identify seasonal sales trends and plan campaigns around peak periods.

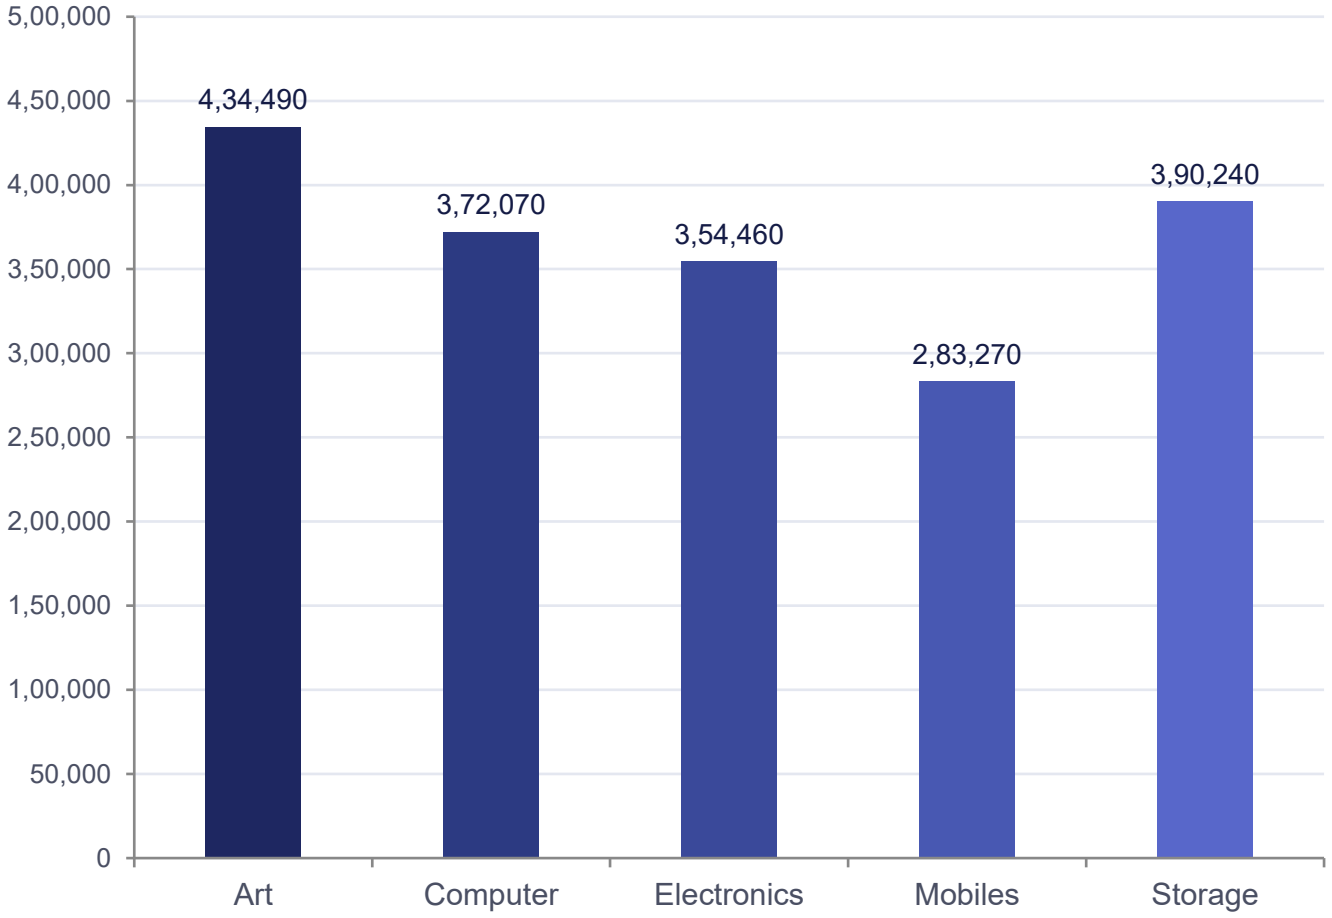

Best Quarter: Qtr 3 • ₹6,22,120

Weakest Quarter: Qtr 4 • ₹2,94,500

Presented by Asrarul Haque

DASHBOARD VISUALIZATION

Category Sales Contribution

BUSINESS INSIGHT

In the original dashboard this is shown as a Waterfall Chart, displaying how each category contributes to total sales of ₹18,34,530. Art leads all categories, while Mobiles contributes the least.

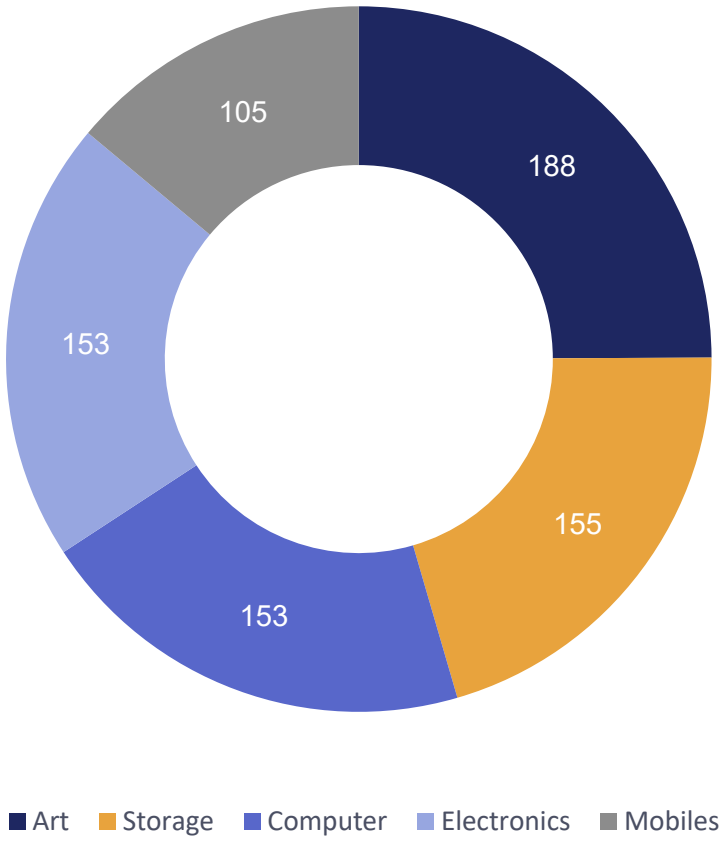

Top Category: Art • ₹4,34,490

Lowest Category: Mobiles • ₹2,83,270

Presented by Asrarul Haque

DASHBOARD VISUALIZATION

Quantity Sold & Interactive Filters

754 units total (originally shown as a Treemap Chart in Excel)

INTERACTIVE FILTERS

Slicers let users analyze data dynamically across three dimensions:

REGION

East, North, South, West

CATEGORY

Art, Computer, Electronics, Mobiles, Storage

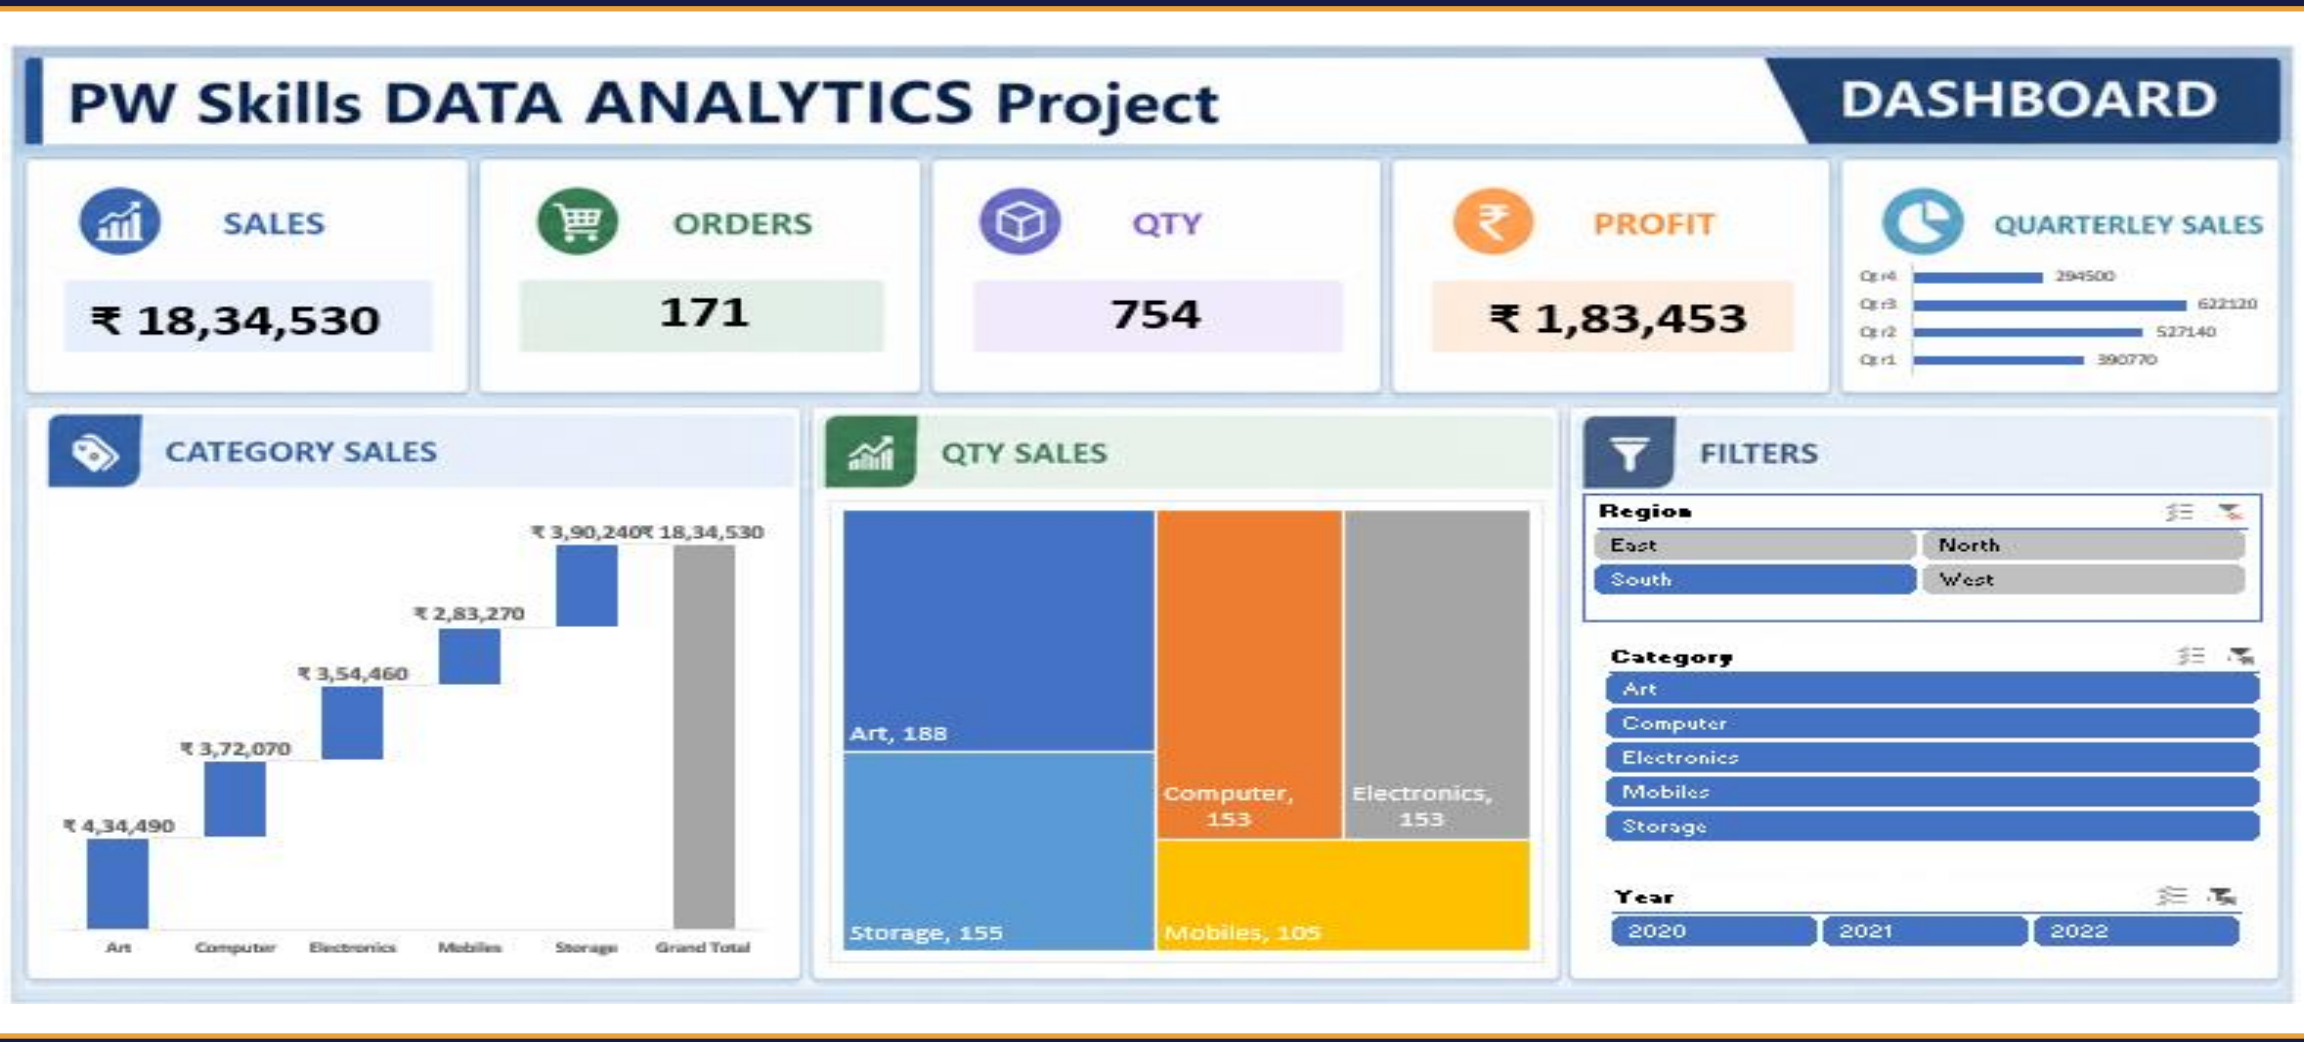

YEAR

2020, 2021, 2022

ANALYSIS OUTCOME

Key Insights from the Dashboard

- Total Sales reached ₹18.34 Lakhs across the analysis period
- Total Profit stood at ₹1.83 Lakhs, reflecting a healthy margin
- 171 orders were completed, totaling 754 units sold
- Quarterly sales show noticeable variation, with Qtr 3 outperforming other quarters
- Category-level analysis identifies Art and Storage as the top revenue contributors
- Interactive filters enable quick analysis by region, category and year

STRATEGIC GUIDANCE

Business Recommendations

1. Focus marketing efforts on high-performing product categories
2. Investigate reasons for lower-performing quarters and plan seasonal campaigns
3. Improve inventory planning using quantity trends
4. Expand sales strategies in regions with lower performance
5. Use yearly comparisons to monitor business growth

REFLECTION & ROADMAP

Challenges Faced & Future Improvements

CHALLENGES FACED

- Creating dynamic KPI cards
- Linking multiple Pivot Tables with slicers
- Selecting the most suitable chart types
- Maintaining a clean and professional layout
- Ensuring the dashboard updates automatically with refreshed data

FUTURE IMPROVEMENTS

- Monthly sales trend analysis
- Customer segmentation
- Top 10 products view
- Salesperson performance tracking
- Profit margin percentage
- Forecasting using Excel
- Power Query automation
- One-click dashboard refresh using VBA

PROJECT SUMMARY

Thank You

This Sales Analysis Interactive Dashboard, built in Microsoft Excel, brings Pivot Tables, Pivot Charts, Slicers, KPI Cards, a Waterfall Chart and a Treemap Chart together into one interactive view of Sales, Orders, Quantity and Profit. Quarterly trends and category-wise analysis are filterable by Region, Category and Year, giving businesses a single, reliable source for faster decision-making.
