PW SKILLS DATA ANALYTICS PROJECTS

Income / Expenses Balance Sheet Dashboard

A Microsoft Excel Dashboard Project | Financial Period 2025–2026

TOTAL INCOME	TOTAL EXPENSES	TOTAL PROFIT	TOTAL LOSS
₹83,500	₹90,899	₹0	₹7,399

Presented by Asrarul Haque

PROJECT OVERVIEW

Objective of the Dashboard

The objective of this dashboard is to monitor and compare income and expenses over a selected financial period. It provides a clear summary of total income, total expenses, profit, and loss — helping individuals or businesses understand their financial position at a glance.

- Tracks total income across sources
- Tracks total expenses across categories
- Automatically calculates profit or loss
- Presents everything in one visual summary

PROJECT SNAPSHOT

Tool Used

Microsoft Excel

Period Covered

01-01-2026 to 05-01-2026

Income Records

3 entries

Expense Records

5 entries

Net Result

Loss of ₹7,399

Presented by Asrarul Haque

BUSINESS PROBLEM

Why This Dashboard Was Needed

Many individuals and small businesses maintain income and expense records in separate Excel sheets. This makes it difficult to answer simple but critical financial questions.

1. What is the total income?
2. What is the total expense?
3. Is the business making a profit or a loss?
4. Which income sources contribute the most?
5. Which expenses have the biggest impact?

This dashboard solves these problems by presenting all key financial information in one place.

DATASET

Income & Expense Tables

The dashboard is built using two main tables, each capturing transaction-level detail.

INCOME TABLE

Fields: Date • Source of Income • Amount

- Salary
- Overtime
- Tuition

Example sources recorded in the dataset

EXPENSE TABLE

Fields: Date • Source of Expense • Amount

- House Rent
- Phone Bill
- Grocery
- Electricity
- Mobile Purchase

DATA PREPARATION

Data Cleaning Steps

1. Removed duplicate entries
2. Standardized date formats
3. Checked for missing values
4. Verified all amount fields as numeric
5. Corrected inconsistent income and expense names
6. Organized the data into structured Excel tables

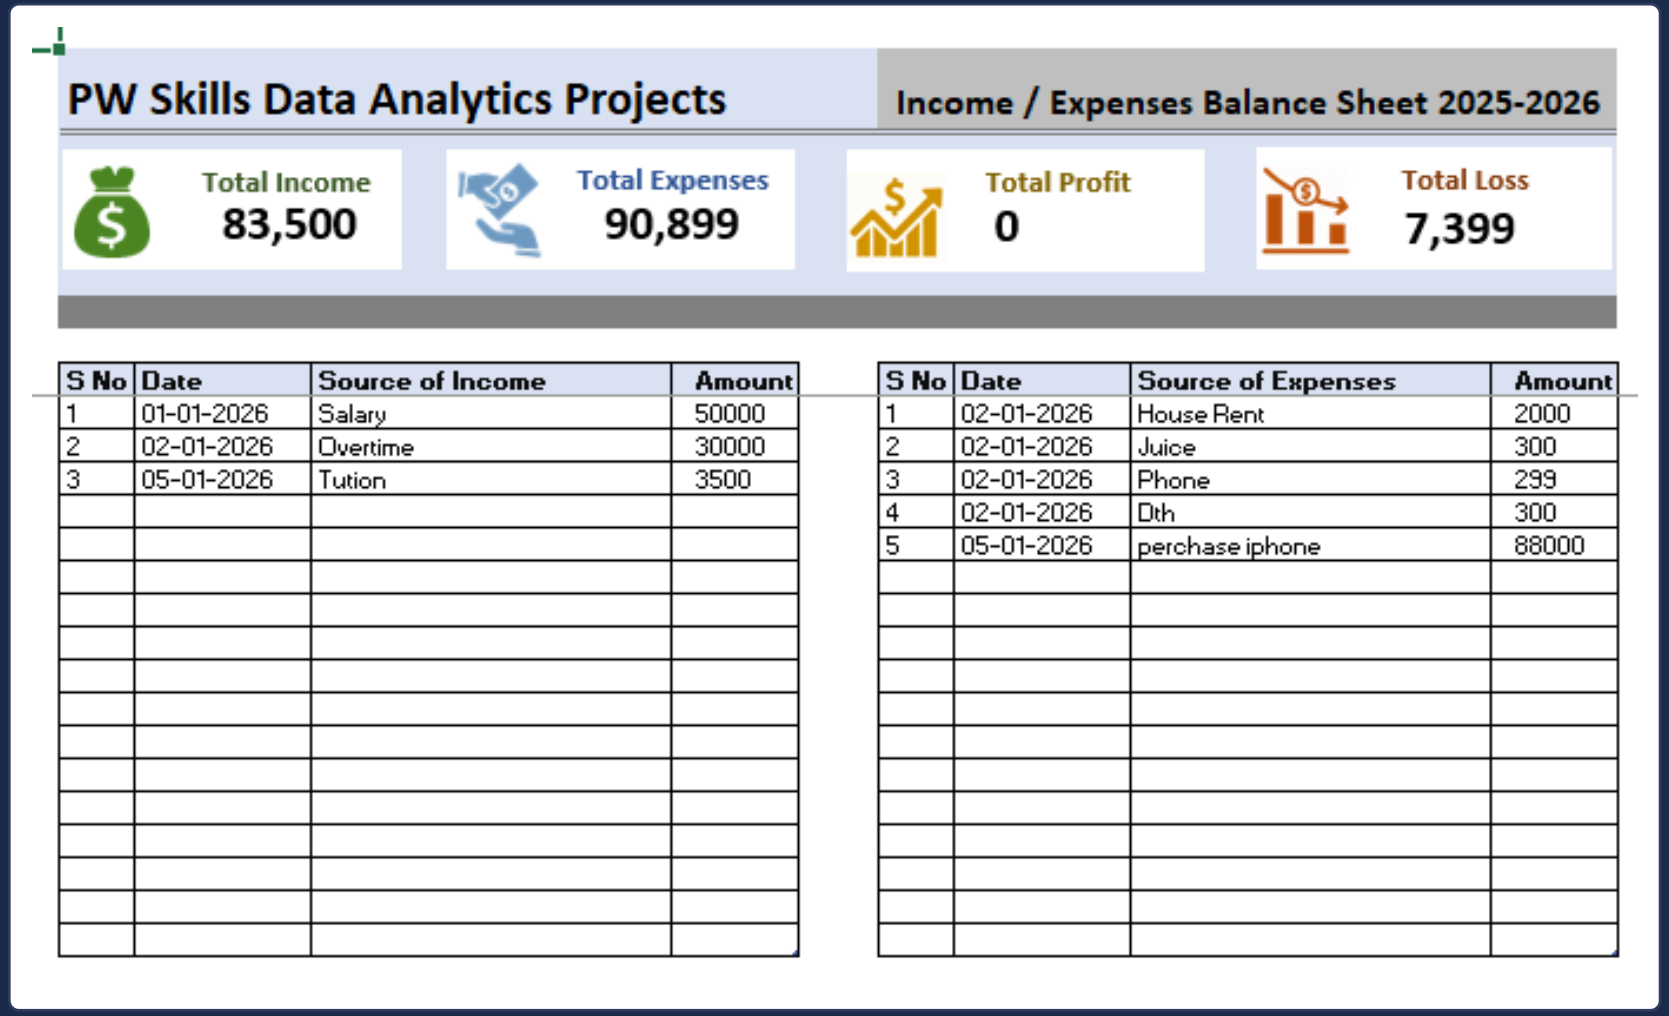

METHODOLOGY

Excel Features Used

- **Excel Tables**
- **SUM Formula**
- **IF Formula**
- **Cell Referencing**
- **Number Formatting**
- **Conditional Formatting**
- **Dashboard Layout Design**
- **Icons for KPI Cards**
- **Basic Financial Calculations**

Income / Expenses Balance Sheet 2025-2026

Total Income	Total Expenses	Total Profit	Total Loss
83,500	90,899	0	7,399

S No	Date	Source of Income	Amount
1	01-01-2026	Salary	50000
2	02-01-2026	Overtime	30000
3	05-01-2026	Tution	3500

S No	Date	Source of Expenses	Amount
1	02-01-2026	House Rent	2000
2	02-01-2026	Juice	300
3	02-01-2026	Phone	299
4	02-01-2026	Dth	300
5	05-01-2026	perchase iphone	88000

Presented by Asrarul Haque

DASHBOARD COMPONENTS

KPI Summary Cards

TOTAL INCOME

₹83,500

Displays the total income earned during the selected period.

TOTAL EXPENSES

₹90,899

Shows the total amount spent.

TOTAL PROFIT

₹0

Since expenses are greater than income, no profit is generated.

TOTAL LOSS

₹7,399

Shows the total financial loss for the selected period.

The top KPI section provides an instant overview of financial performance so decision-makers can quickly understand whether they are in profit or loss.

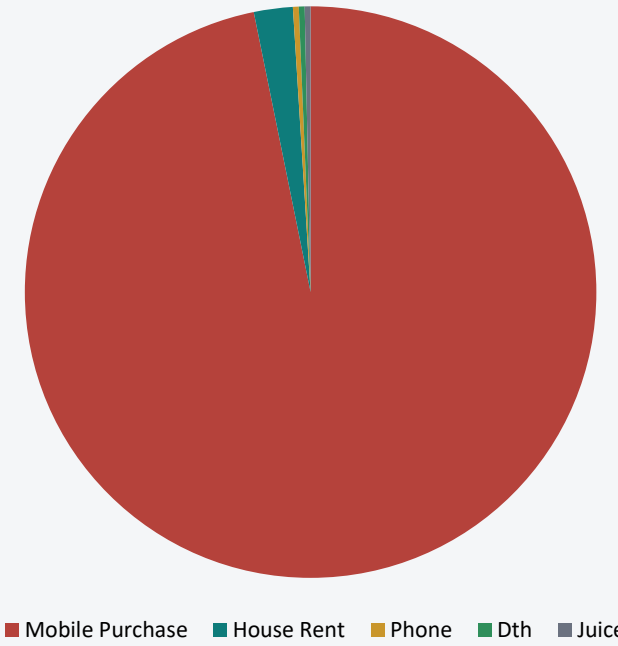

ANALYSIS

Key Insights

Total income recorded	₹83,500
Total expenses recorded	₹90,899
Expenses exceed income by	₹7,399

A major expense is the iPhone purchase (₹88,000), which significantly impacts the financial result.

EXPENSE BREAKDOWN

RECOMMENDATIONS

Business Recommendations

1. Review large one-time expenses before making purchases
2. Set a monthly expense budget
3. Increase income through additional revenue sources
4. Monitor recurring expenses regularly
5. Track profit and loss on a monthly basis
6. Add budget vs actual comparisons for better financial control

REFLECTION

Challenges Faced & Future Improvements

CHALLENGES FACED

- Creating accurate profit/loss calculations
- Designing clear KPI cards
- Maintaining consistent formatting
- Ensuring calculations update automatically when data changes

FUTURE IMPROVEMENTS

- Monthly Income vs Expense Trend
- Category-wise Expense Analysis
- Budget vs Actual Comparison
- Cash Flow Statement & Savings Percentage
- Interactive Filters (Month, Year, Category)
- Power Query for automatic data refresh
- Pivot Charts for visual analysis

2-MINUTE INTERVIEW EXPLANATION

“This is an Income and Expenses Balance Sheet Dashboard that I developed using Microsoft Excel. The objective of this project is to compare income and expenses and provide a quick overview of financial performance. I used Excel formulas, structured tables, KPI cards, and dashboard formatting to present key financial metrics. The dashboard displays Total Income, Total Expenses, Profit, and Loss, along with detailed income and expense tables for transaction-level analysis. This project demonstrates how Excel can be used to build a simple yet effective financial reporting solution for individuals or small businesses.”
