Product Sales Performance Dashboard

A Microsoft Excel Dashboard Project — Analyzing Sales Across Products, Companies, Salespersons and Time

TOTAL SALES AMOUNT

₹ 23,47,644

Presented by Asrarul Haque

PROJECT OVERVIEW

Project Objective

To analyze product sales performance by monitoring sales across different products, companies, salespersons, and time periods — providing an interactive view that helps management identify top-performing products, salespersons, and companies.

PRODUCTS

Computer, Laptop, Mobile

COMPANIES

Apple, Dell, HP, HCL

SALESPERSONS

Aman, Rahul, Ram, Rohit, Vinod

BUSINESS PROBLEM

Key Questions Sales Managers Need Answered

1. Which product generates the highest sales?
2. Which salesperson performs the best?
3. Which company contributes the most revenue?
4. How do sales change over different months?
5. How can we filter sales data quickly?

Instead of reviewing large Excel sheets, this dashboard provides all key information in one interactive screen.

DATASET

Sales Transaction Data

Fields Captured

- Date
- Month
- Salesperson
- Company
- Product
- Sales Amount
- Quantity (if available)

PRODUCTS

Computer • Laptop • Mobile

COMPANIES

Apple • Dell • HP • HCL

SALESPERSONS

Aman • Rahul • Ram • Rohit • Vinod

PREPARATION

Data Cleaning Steps

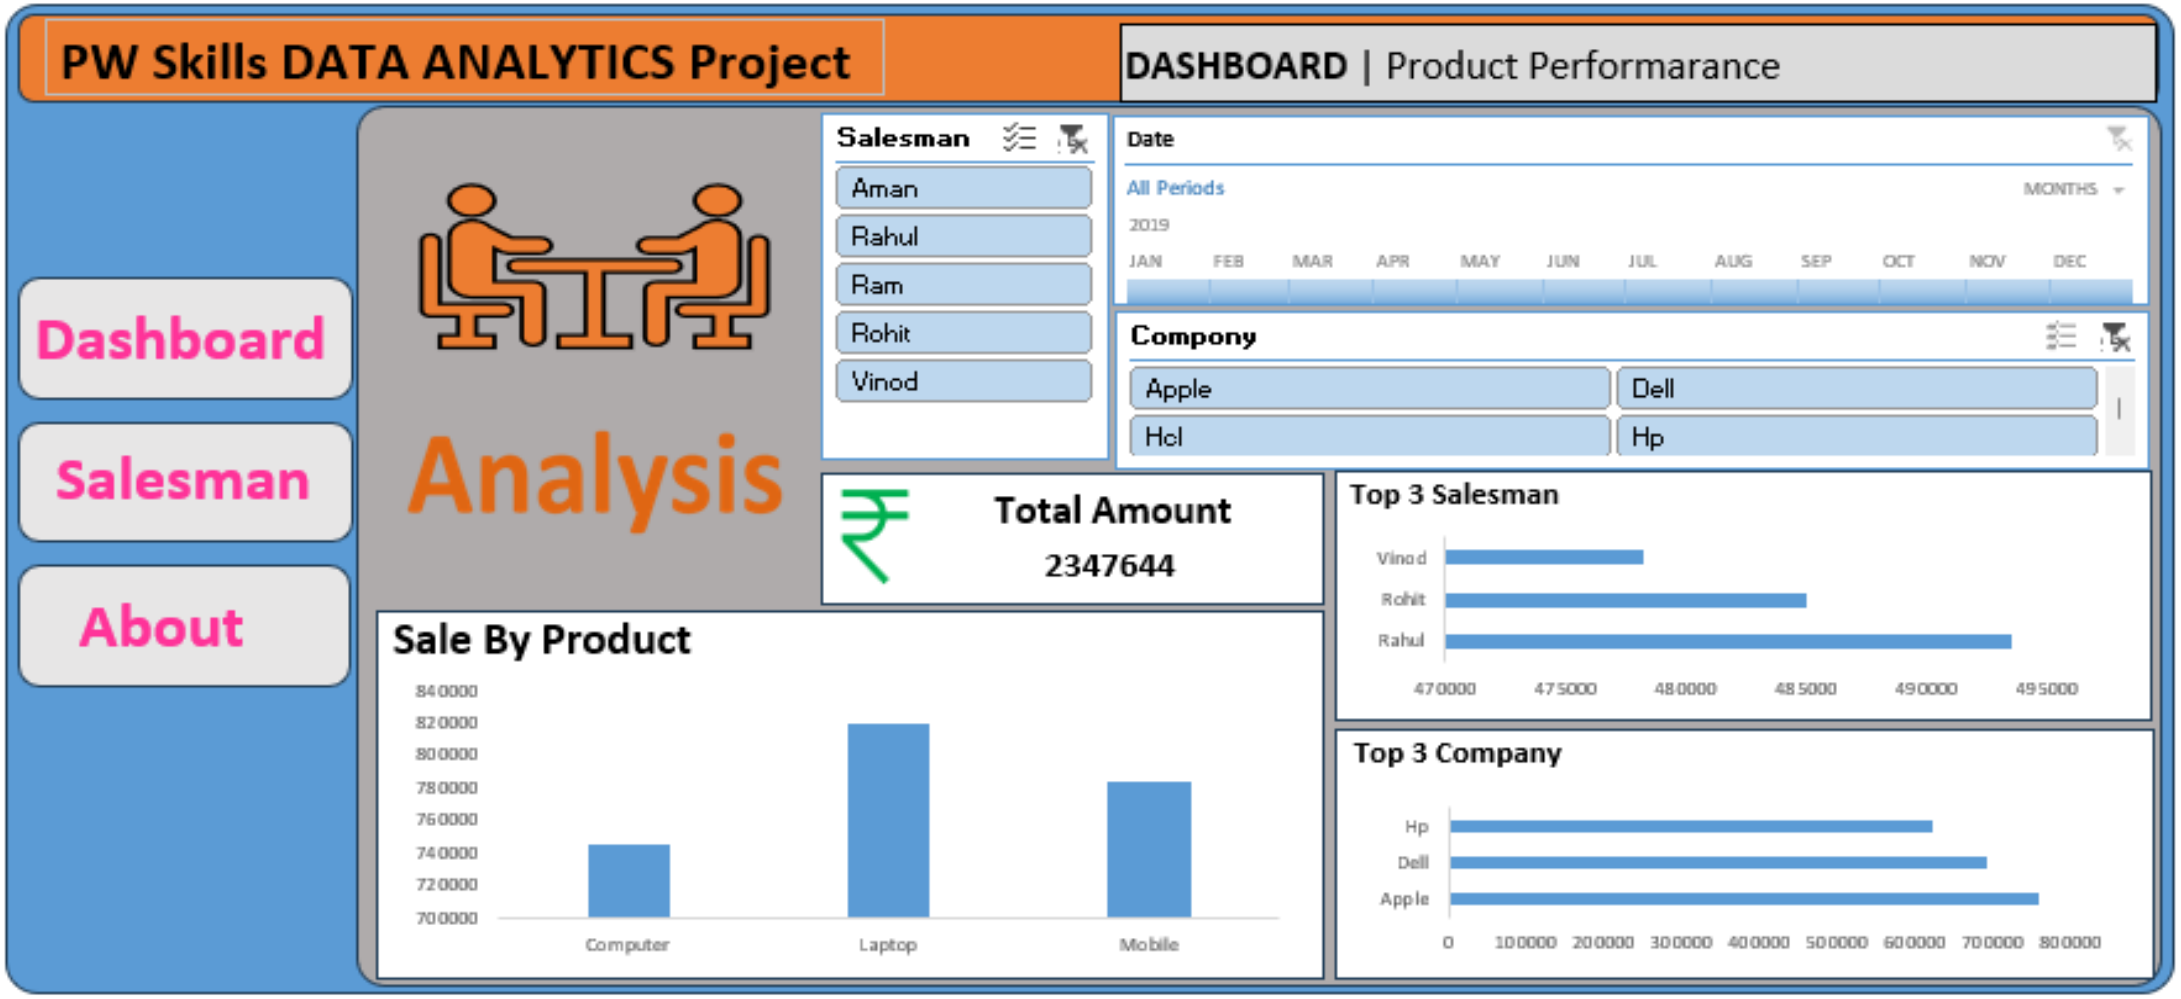

1. Removed duplicate records
2. Checked blank values
3. Standardized company and product names
4. Converted dates into Excel date format
5. Verified sales amounts
6. Created structured Excel tables for analysis

TECHNIQUES

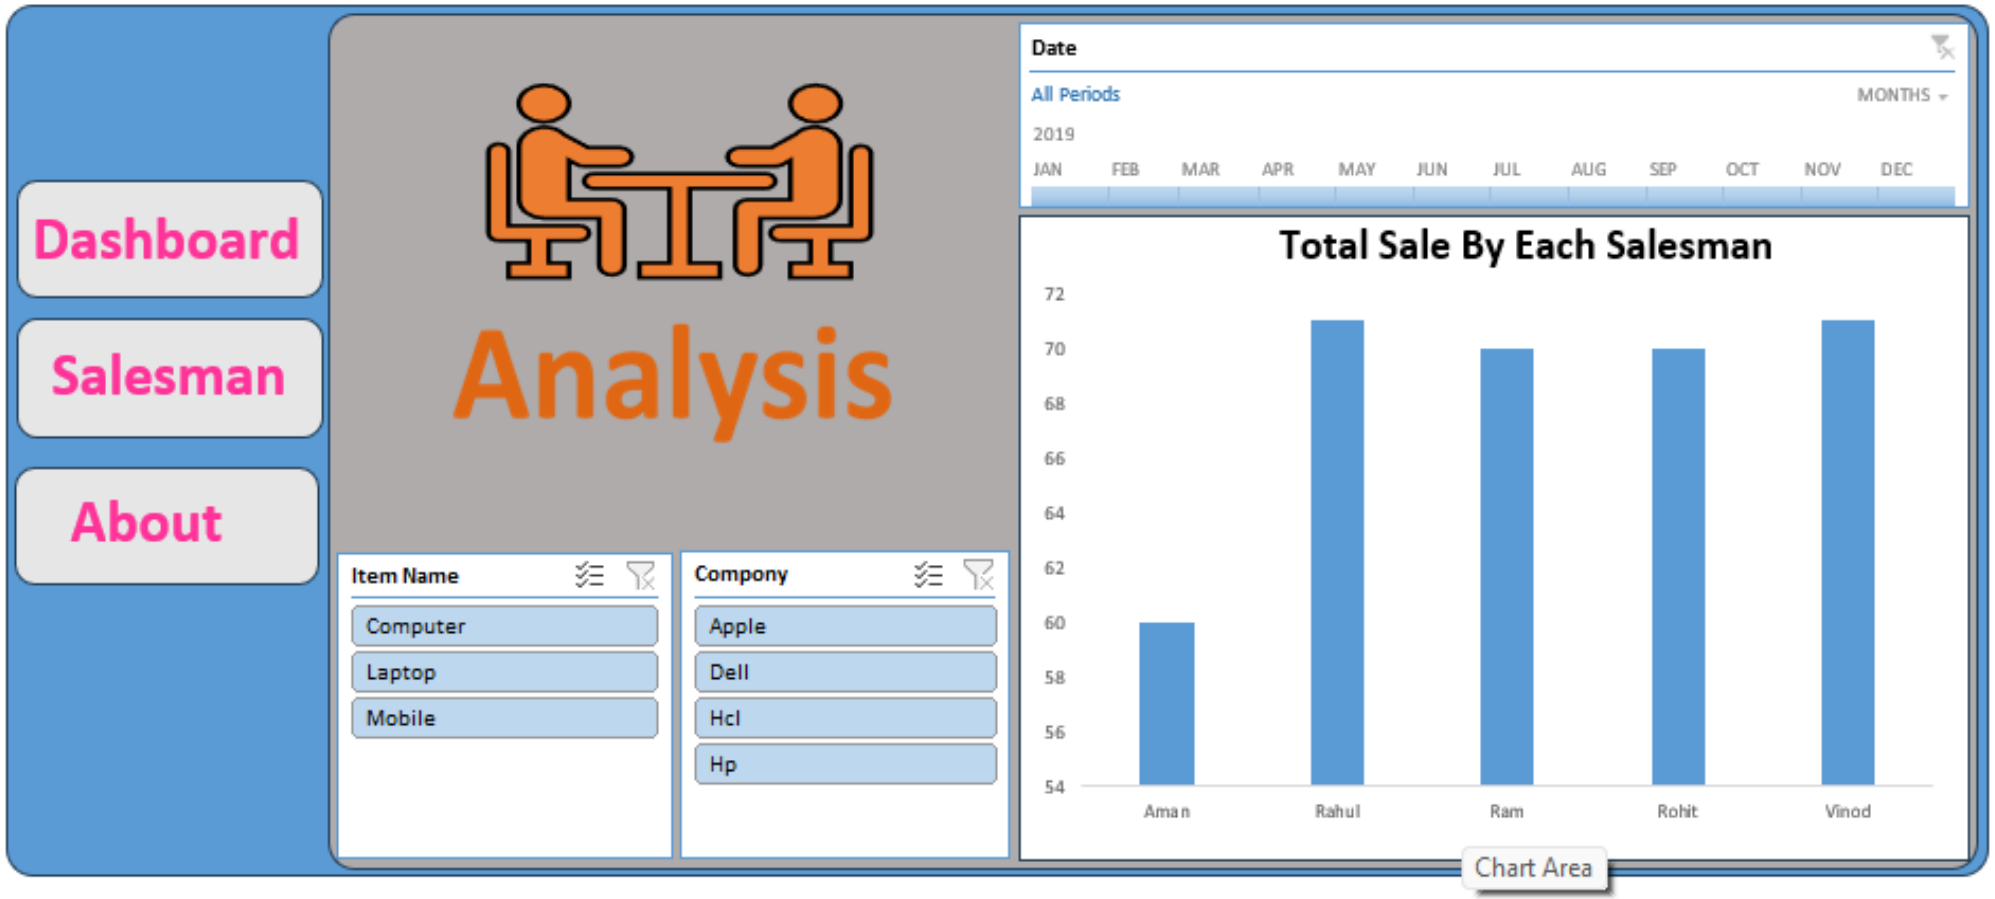

Excel Features Used

- Pivot Tables
- Pivot Charts
- Slicers
- Timeline Filter
- KPI Cards
- Column Charts
- Bar Charts
- Interactive Dashboard Design
- Conditional Formatting
- Excel Tables
- Sorting and Filtering

Main Dashboard View

Salesman Analysis View

FINDINGS

Key Insights

TOTAL SALES AMOUNT

₹23,47,644

Top Product

Laptop

Top Company

Apple

- Laptop appears to generate the highest product sales among all categories.
- The Top 3 Salespersons are clearly ranked, helping management recognize high performers.
- Apple is one of the leading companies based on sales revenue.
- Timeline filters allow users to analyze monthly sales trends with ease.

STRATEGY

Business Recommendations

01 Focus marketing efforts on the highest-selling products

02 Reward top-performing salespersons to improve motivation

03 Strengthen relationships with high-value companies

04 Monitor monthly sales trends to plan future strategies

05 Use the dashboard during sales review meetings

REFLECTION

Challenges & Future Improvements

CHALLENGES FACED

- Creating dynamic slicers connected to multiple Pivot Tables
- Designing a clean and user-friendly dashboard
- Choosing the right charts for different types of analysis
- Ensuring all visuals updated correctly with filters

FUTURE IMPROVEMENTS

- Monthly Sales Trend Line Chart
- Profit Analysis
- Region-wise Sales
- Customer Segmentation
- Sales Target vs Achievement
- Forecasting
- Power Query Automation
- VBA Refresh Button
