POWER BI PROJECT · PORTFOLIO REPORT

# Global Superstore Sales & Profit Analysis Dashboard

*Tracking global performance across markets, categories and time to power data-driven decisions*

**Presented by Asrarul Haque**

# Project Overview

## OBJECTIVE

Analyze global sales and profit data across different years, markets, product categories, and sub-categories to help business managers track performance, identify profitable markets, and make data-driven decisions.

## SCOPE OF ANALYSIS

- A global retail company operating across multiple markets and thousands of products
- Built entirely in Power BI using Power Query, data modeling, and DAX
- Designed as an interactive, filterable executive dashboard

## BUILT WITH

- Power Query
- Data Modeling
- DAX Measures
- Card Visuals
- Interactive Slicers

# Business Problem

*Without a dashboard, answering these questions requires manual analysis of large datasets. Management needs fast, reliable answers to:*

01 How are sales growing year over year?

02 Which markets generate the highest profit?

03 Which product categories contribute the most sales?

04 Which sub-categories are most profitable?

05 How does business performance change over time?

03 · DATA SOURCE

# Dataset

The dashboard uses the Global Superstore dataset, containing detailed transactional records across markets and product lines.

| | | | |
|---|---|---|---|
| 1 Order Date | 2 Sales | 3 Profit | 4 Quantity |
| 5 Discount | 6 Market | 7 Category | 8 Sub-Category |
| 9 Customer Name | 10 Country | 11 Region | 12 Ship Mode |

# Data Preparation

1. Imported the dataset into Power BI
2. Used Power Query to clean the data
3. Removed duplicate records
4. Checked for null values
5. Corrected data types
6. Verified Sales, Profit, and Discount values
7. Built relationships where required
8. Created calculated measures using DAX

# Power BI Features Used

- Power Query
- Data Modeling
- Relationships
- DAX Measures
- Card Visuals
- Area Charts
- Column Charts
- Donut Charts
- Slicers & Filters
- Interactive Design

06 · DASHBOARD METRICS

# Headline KPI Cards

**TOTAL SALES**

**1.71M**

*Total revenue generated*

**TOTAL PROFIT**

**289K**

*Total business profit*

**SHIPPING COST**

**272K**

*Overall shipping expenses*

**TOTAL DISCOUNT**

**9,284%**

*Cumulative metric (see note)*

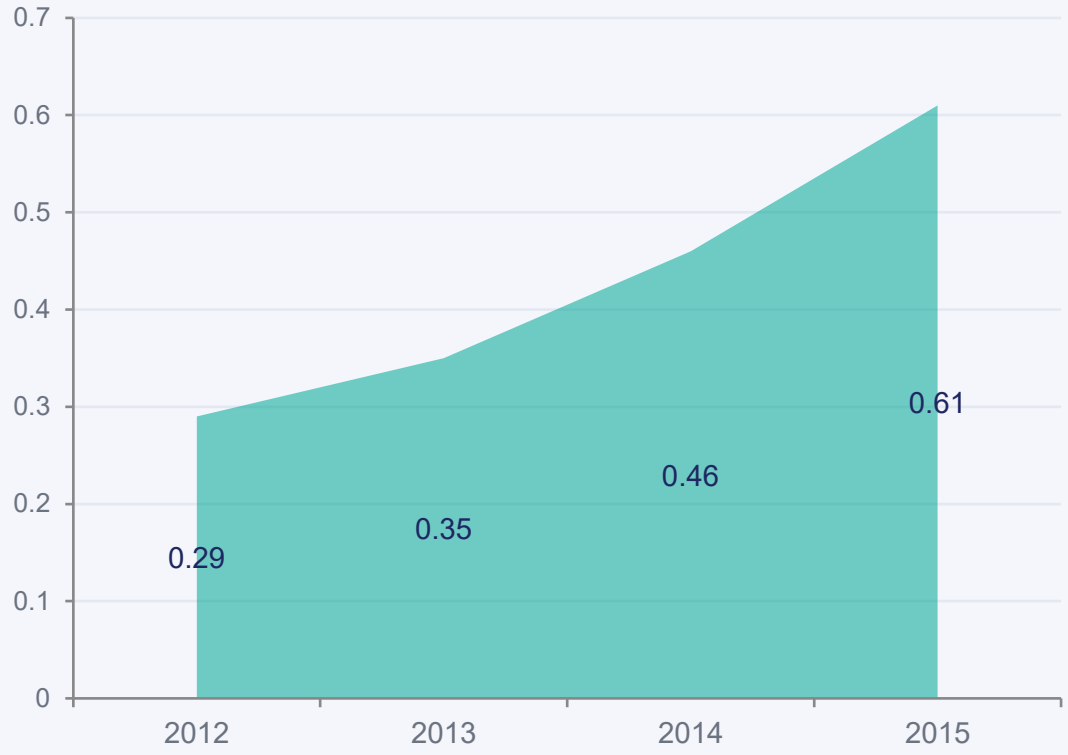

**INTERVIEW NOTE**

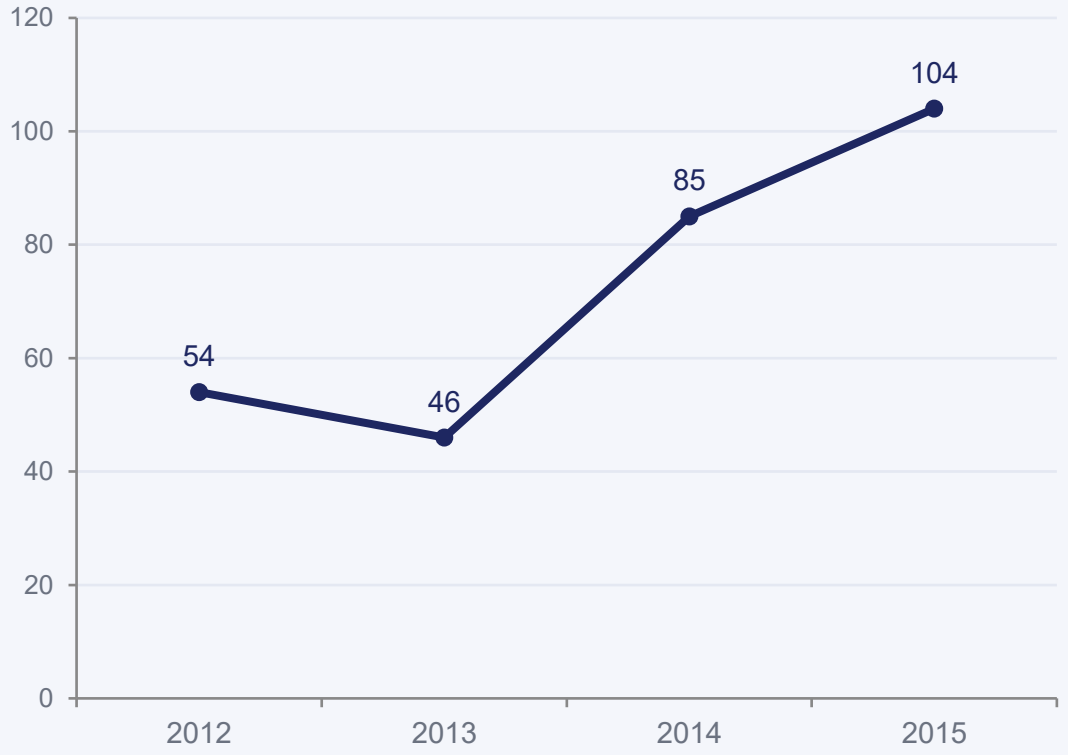

The Total Discount figure of 9,284% is a cumulative sum of discount percentages as displayed in the dashboard. In practice, this would normally be presented as an average discount percentage or a total discount amount, since a raw cumulative percentage can be misleading to stakeholders.

# The Complete Dashboard View

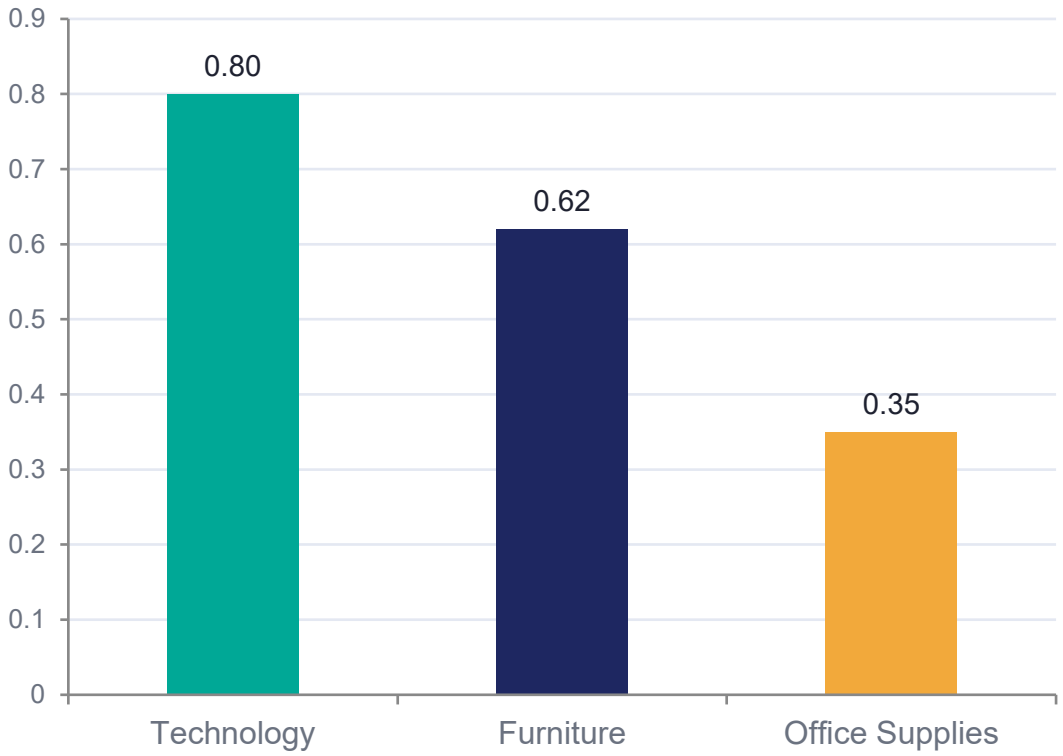

# Year-on-Year Sales & Profit

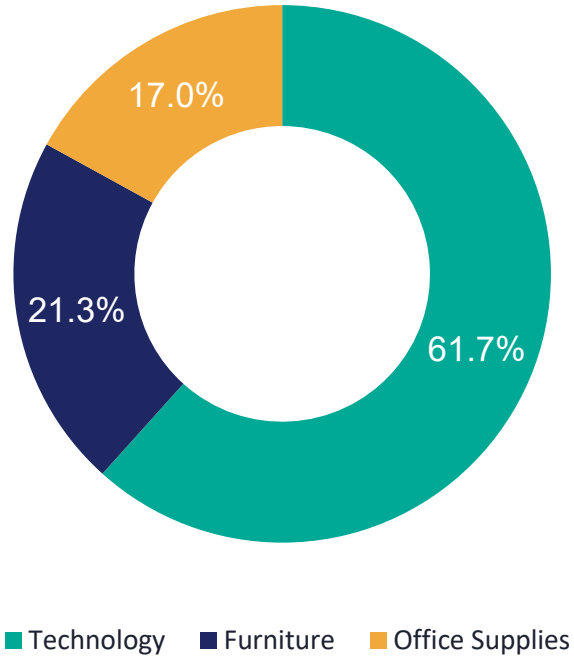

# Category Performance

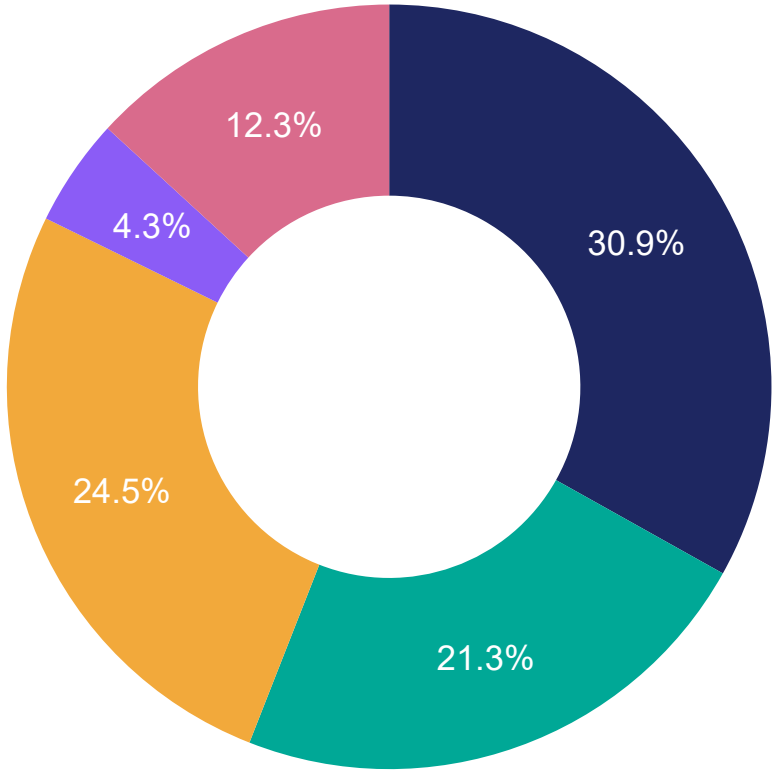

### Category-wise Sales ($M)

### Profit Contribution by Category

# Profit Contribution by Market

MARKET BREAKDOWN

| | |
|---|---|
| USCA | 30.85% |
| APAC | 21.28% |
| Europe | 24.50% |
| Africa | 4.25% |
| LATAM | 12.28% |

# Interactive Filters

### Year Filter

- ☐ 2012
- ☐ 2013
- ☐ 2014
- ☐ 2015
- ☐ 2016

### Market Filter

- ☐ Africa
- ☐ Asia Pacific
- ☐ Europe
- ☐ LATAM
- ☐ USCA

### Category Filter

- ☐ Technology
- ☐ Furniture
- ☐ Office Supplies

### Sub-Category Filter

- ☐ Drill down into specific product groups

# Key Insights

- Total Sales reached 1.71 Million across all markets
- Total Profit stands at 289K, reflecting healthy margins
- Sales increased steadily between 2012 and 2015
- Profit also showed strong growth, especially in later years
- Technology is the highest-selling product category
- Some markets contribute significantly more profit, highlighting regional performance differences
- Interactive filters allow detailed analysis by year, market, category, and sub-category

13 · STRATEGIC ACTIONS

# Business Recommendations

1

### Invest More in High-Performing Markets

Double down on regions like USCA and Europe that already lead in profit contribution.

2

### Increase Focus on Technology Products

Technology drives the largest share of sales — prioritize inventory and marketing here.

3

### Review Low-Performing Markets

Investigate underperforming regions such as Africa to uncover improvement opportunities.

4

### Optimize Discount Strategies

Tighten discount policy to protect profit margins across categories.

5

### Track Shipping Costs Regularly

Monitor shipping expenses to improve operational efficiency over time.

# Challenges & Future Improvements

## CHALLENGES FACED

- Cleaning a large, complex dataset
- Building an effective data model
- Writing DAX measures for KPIs
- Choosing the right visuals for comparison
- Maintaining report performance with multiple filters

## FUTURE ENHANCEMENTS

- Sales Forecasting
- Customer Segmentation
- Top 10 Customers Analysis
- Geographic Map Visual
- Drill-through Pages
- Dynamic Tooltips & Bookmarks
- Row-Level Security (RLS)
- AI Visuals & Decomposition Tree

# Thank You

*This project strengthened skills in Power Query, DAX, data modeling, and interactive dashboard development — turning raw retail data into clear, actionable business insight.*
