PW SKILLS DATA ANALYTICS PROJECT

Grocery Store Sales Analysis Dashboard

ZEPTO vs **BLINKIT** | Built with Power BI

A comparative sales, delivery, and customer-satisfaction analysis of two quick-commerce platforms — built to support data-driven business decisions.

Presented by Asrarul Haque

PROJECT OVERVIEW

What This Dashboard Does

Objective

Compare the sales performance of two quick-commerce grocery platforms, Zepto and Blinkit, covering sales, delivery performance, customer ratings, city-wise and product-wise sales, and payment preferences.

Business Value

Helps management evaluate business performance at a glance and make faster, data-driven decisions — instead of manually reviewing thousands of order records.

AVG CUSTOMER RATING

BUSINESS PROBLEM

The Questions Management Needs Answered

Quick-commerce companies receive thousands of orders every day. This dashboard replaces manual analysis with a single interactive report.

- Q **Which brand performs better?**
- Q **Which city generates the highest sales?**
- Q **Which products sell the most?**
- Q **Which payment method is most preferred?**
- Q **What is the average delivery time?**
- Q **What is the customer satisfaction rating?**

DATASET

What's Inside the Data

Order ID	**Order Date**	**Brand**
Product Name	**Category**	**City**
Sales Amount	**Delivery Time**	**Customer Rating**
Payment Mode	**Quarter**	

11 fields captured per order — enough to analyze sales, delivery, ratings, and payment behaviour together.

DATA PREPARATION

Getting the Data Analysis-Ready

1. Imported the dataset into Power BI
2. Removed duplicate records
3. Checked for missing values
4. Standardized category and city names
5. Corrected data types
6. Created relationships between tables
7. Built DAX measures for KPIs

7

preparation steps completed before building a single visual

TOOLS & TECHNIQUES

Power BI Features Used

- Power Query
- Data Cleaning
- Data Modeling
- Relationships
- DAX Measures
- KPI Cards
- Slicers
- Bar & Column Charts
- Interactive Dashboard
- Filters
- Report Formatting

KPI HIGHLIGHTS

The Numbers That Matter

223K

TOTAL SALES

Displays total sales generated across both platforms.

15.49

minutes

AVG DELIVERY TIME

Measures overall delivery efficiency.

2.97

/ 5

AVG RATING

Shows overall customer satisfaction.

DASHBOARD VISUALIZATION

Sales by Month

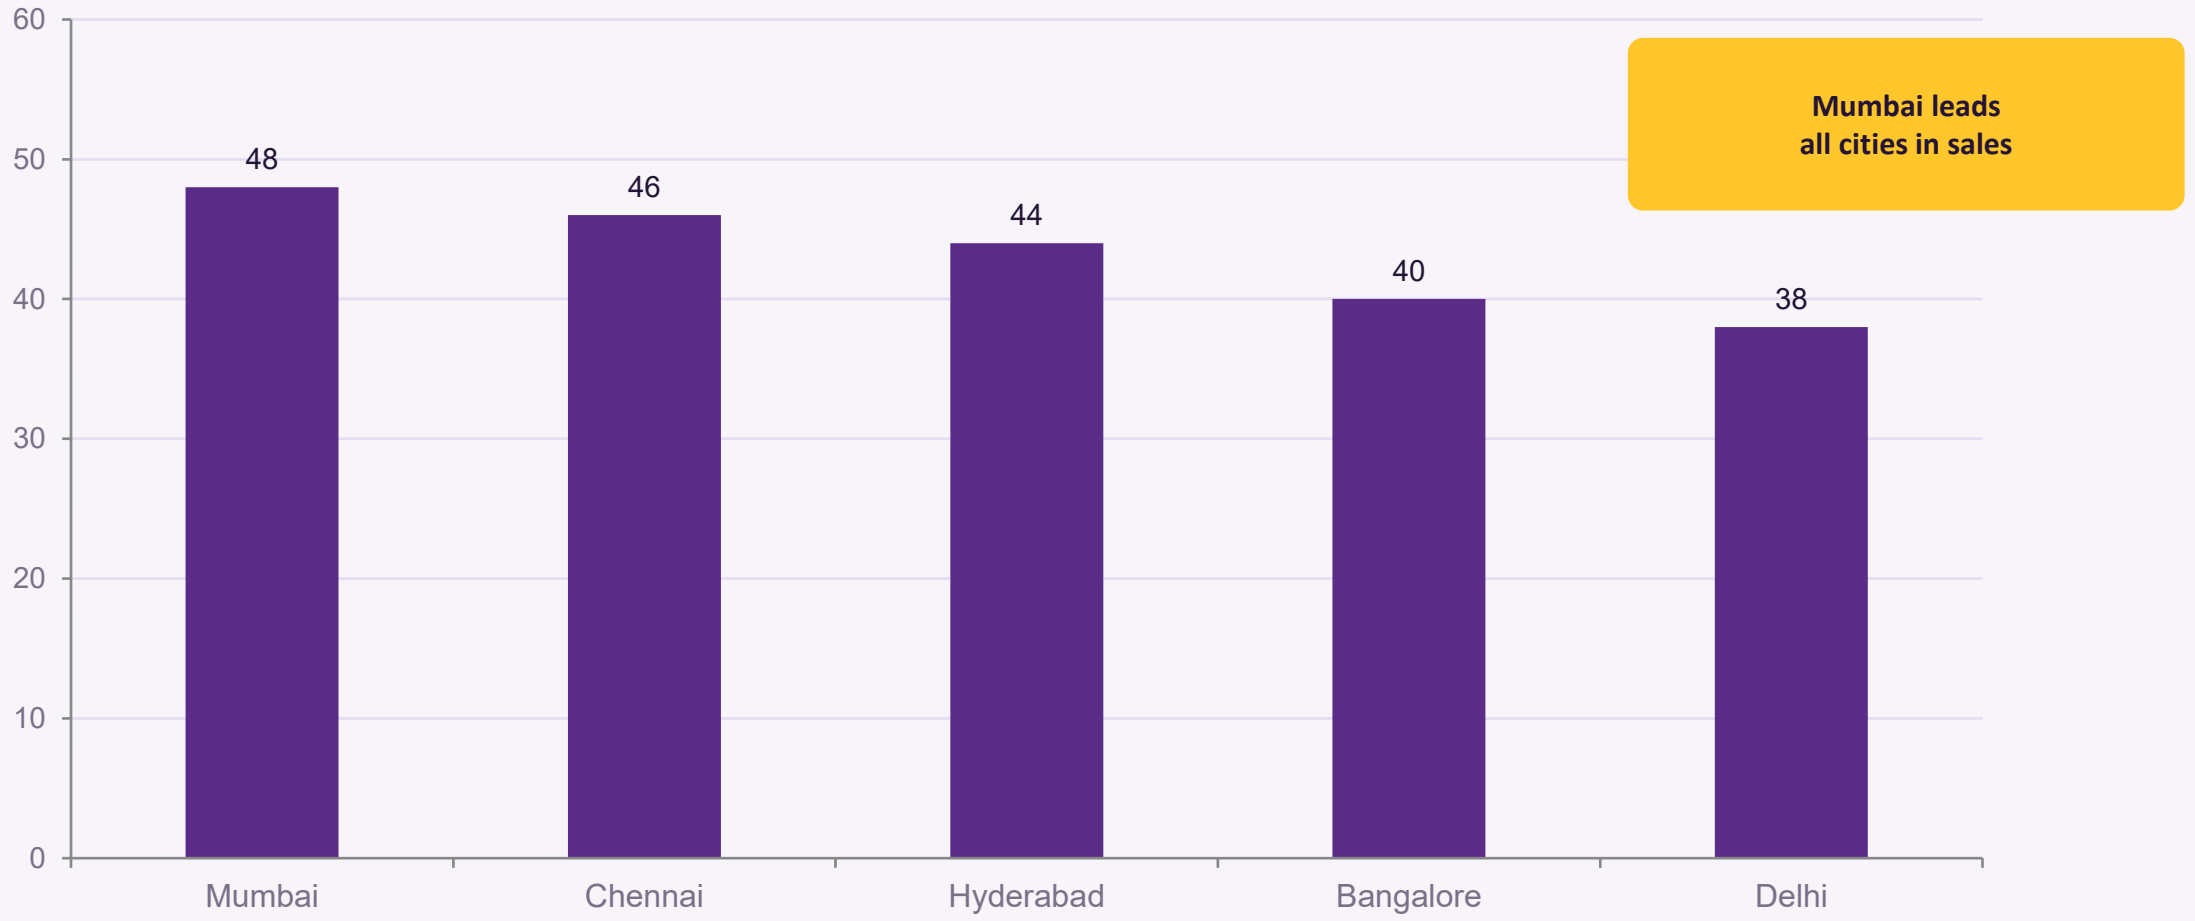

Business value: helps identify seasonal demand and sales trends.

DASHBOARD VISUALIZATION

City-wise Sales

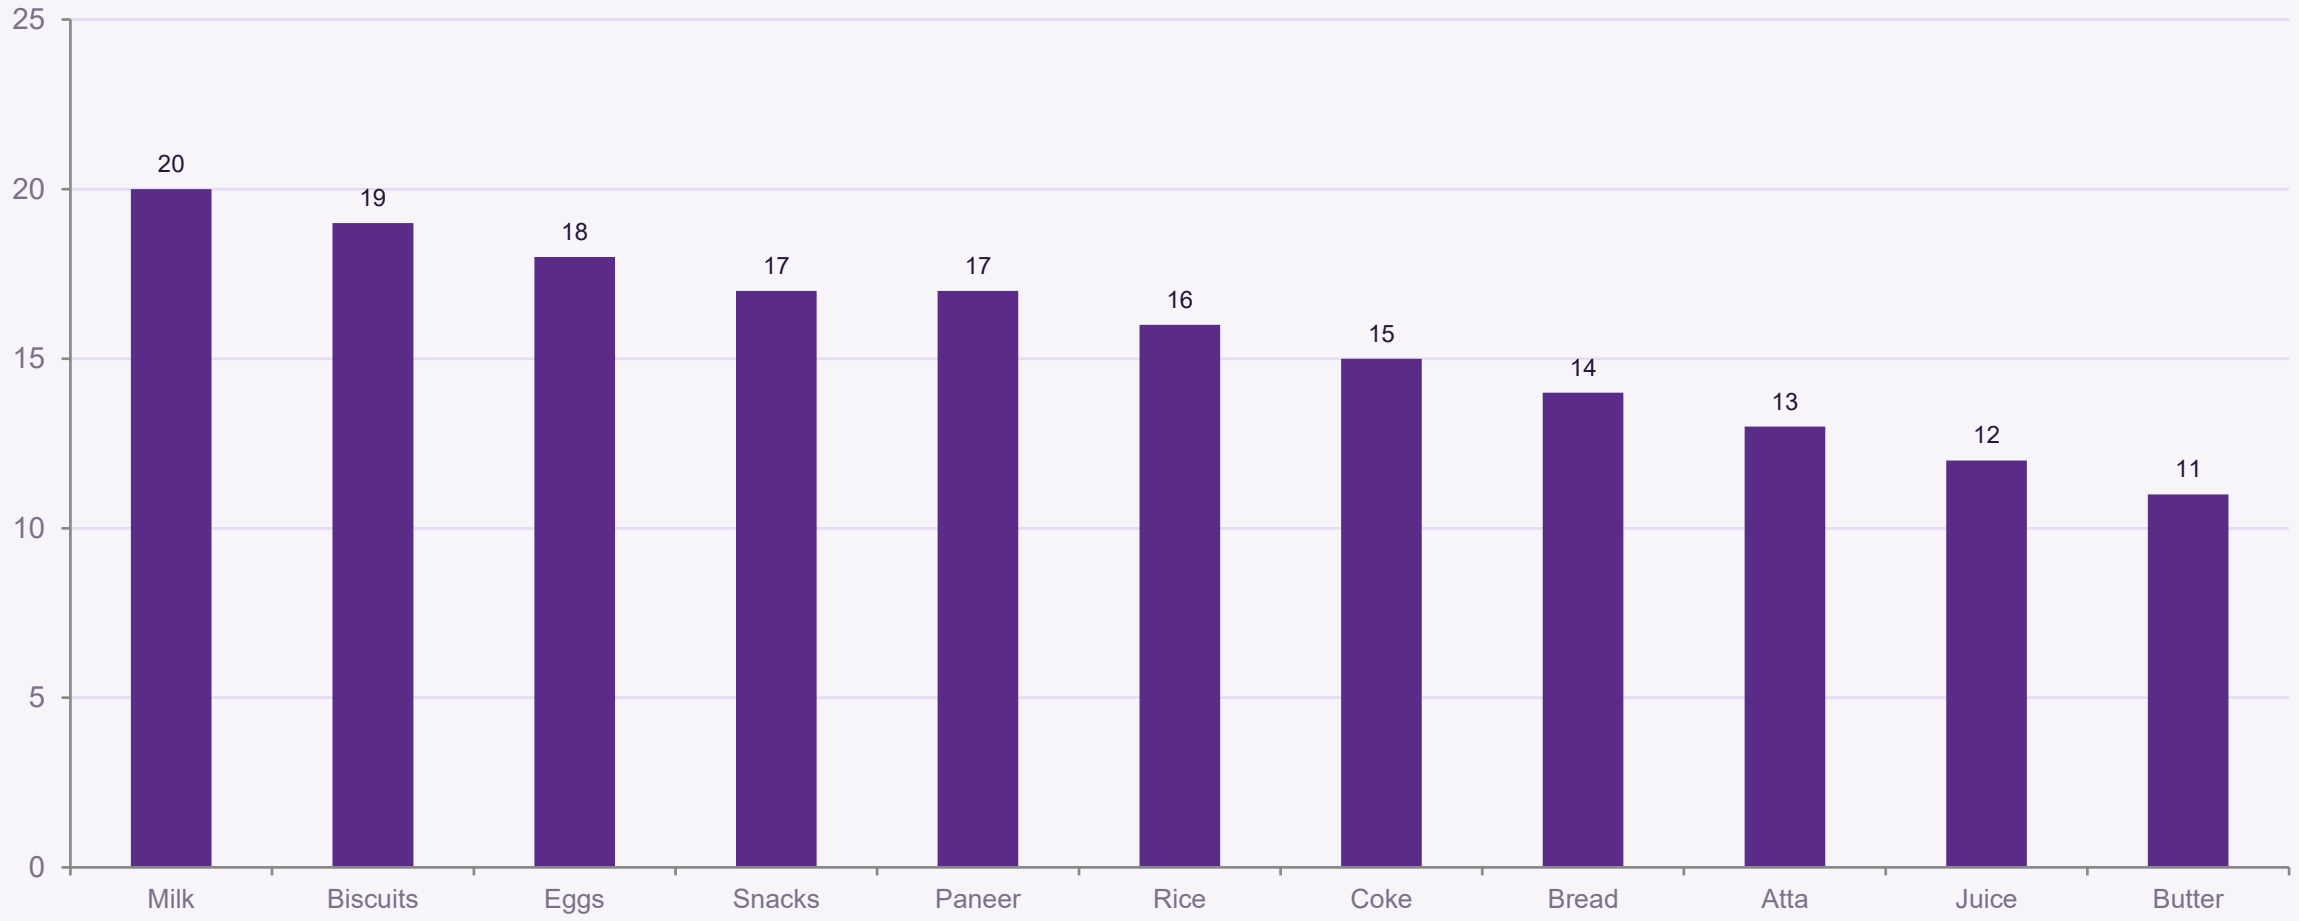

Business value: identifies the strongest and weakest markets.

DASHBOARD VISUALIZATION

Product-wise Sales

Business value: helps identify top-selling products and optimize inventory.

INTERACTIVITY

Interactive Filters

These filters allow users to perform dynamic, self-service analysis.

Quarter

Qtr 1 | Qtr 2 | Qtr 3 | Qtr 4

Brand

Blinkit | Zepto

Payment Mode

Card | COD | UPI

Category

Bakery | Beverages | Dairy | Grains | Poultry | Snacks

FINDINGS

Key Insights

- ✓ Total Sales reached 223K.
- ✓ Average Delivery Time is 15.49 minutes.
- ✓ Average Customer Rating is 2.97.
- ✓ Mumbai records the highest sales among the listed cities.
- ✓ Some products consistently outperform others in sales.
- ✓ Monthly analysis helps identify peak demand periods.
- ✓ Payment mode filters help understand customer payment preferences.

RECOMMENDATIONS

What Management Should Do Next

01

Increase inventory for top-selling products.

02

Improve delivery operations to reduce delivery time.

03

Focus marketing campaigns in high-performing cities.

04

Investigate reasons behind the relatively low average customer rating.

05

Encourage digital payment methods by offering cashback or discounts.

BEHIND THE SCENES

Challenges Faced

- Cleaning inconsistent grocery sales data
- Building DAX measures for KPIs
- Creating interactive slicers
- Selecting visuals suitable for retail analysis
- Designing a user-friendly dashboard layout

ROADMAP

Future Improvements

1. Profit Analysis
2. Customer Segmentation
3. Repeat Customer Analysis
4. Delivery Partner Performance
5. Discount Analysis
6. Inventory Dashboard
7. Forecasting
8. Drill-through Reports
9. Dynamic Tooltips
10. Map Visuals
