Project Overview

Project Objective

The objective of this project is to analyze global retail sales performance by monitoring revenue, profit, cost, orders, customer segments, product categories, and sub-categories. The dashboard provides business managers with a single interactive view to evaluate overall performance and support data-driven decision-making.

- Interactive
- Data-Driven
- KPI Monitoring
- Multi-Market

02 · CONTEXT

Business Problem

A retail company sells products across multiple markets and categories. Management needs quick, reliable answers to key performance questions — this dashboard was built to solve exactly that.

1. **What is the total revenue and profit?**
2. **Which product categories perform the best?**
3. **Which customer segment generates the highest revenue?**
4. **Which sub-categories contribute the most profit?**
5. **How can performance be analyzed using filters?**

Dataset

The dashboard is built on the Global Superstore dataset, covering detailed order-level records across markets, categories, and customer segments.

Order ID	**Order Date**	**Customer Name**
Segment	**Market**	**Category**
Sub-Category	**Sales**	**Cost**
Profit	**Ship Mode**	**Quantity**

DATASET AT A GLANCE

51,290
TOTAL ORDERS ANALYZED

3
Product Categories

3
Customer Segments

12
Data Fields Tracked

Data Preparation

Before building the dashboard, the raw dataset was cleaned and structured to ensure accurate, trustworthy analysis.

1. Imported the dataset into Tableau
2. Removed duplicate records
3. Checked for missing values
4. Corrected data types
5. Standardized category and segment names
6. Created calculated fields for KPIs
7. Verified revenue, cost, and profit calculations

Tableau Features Used

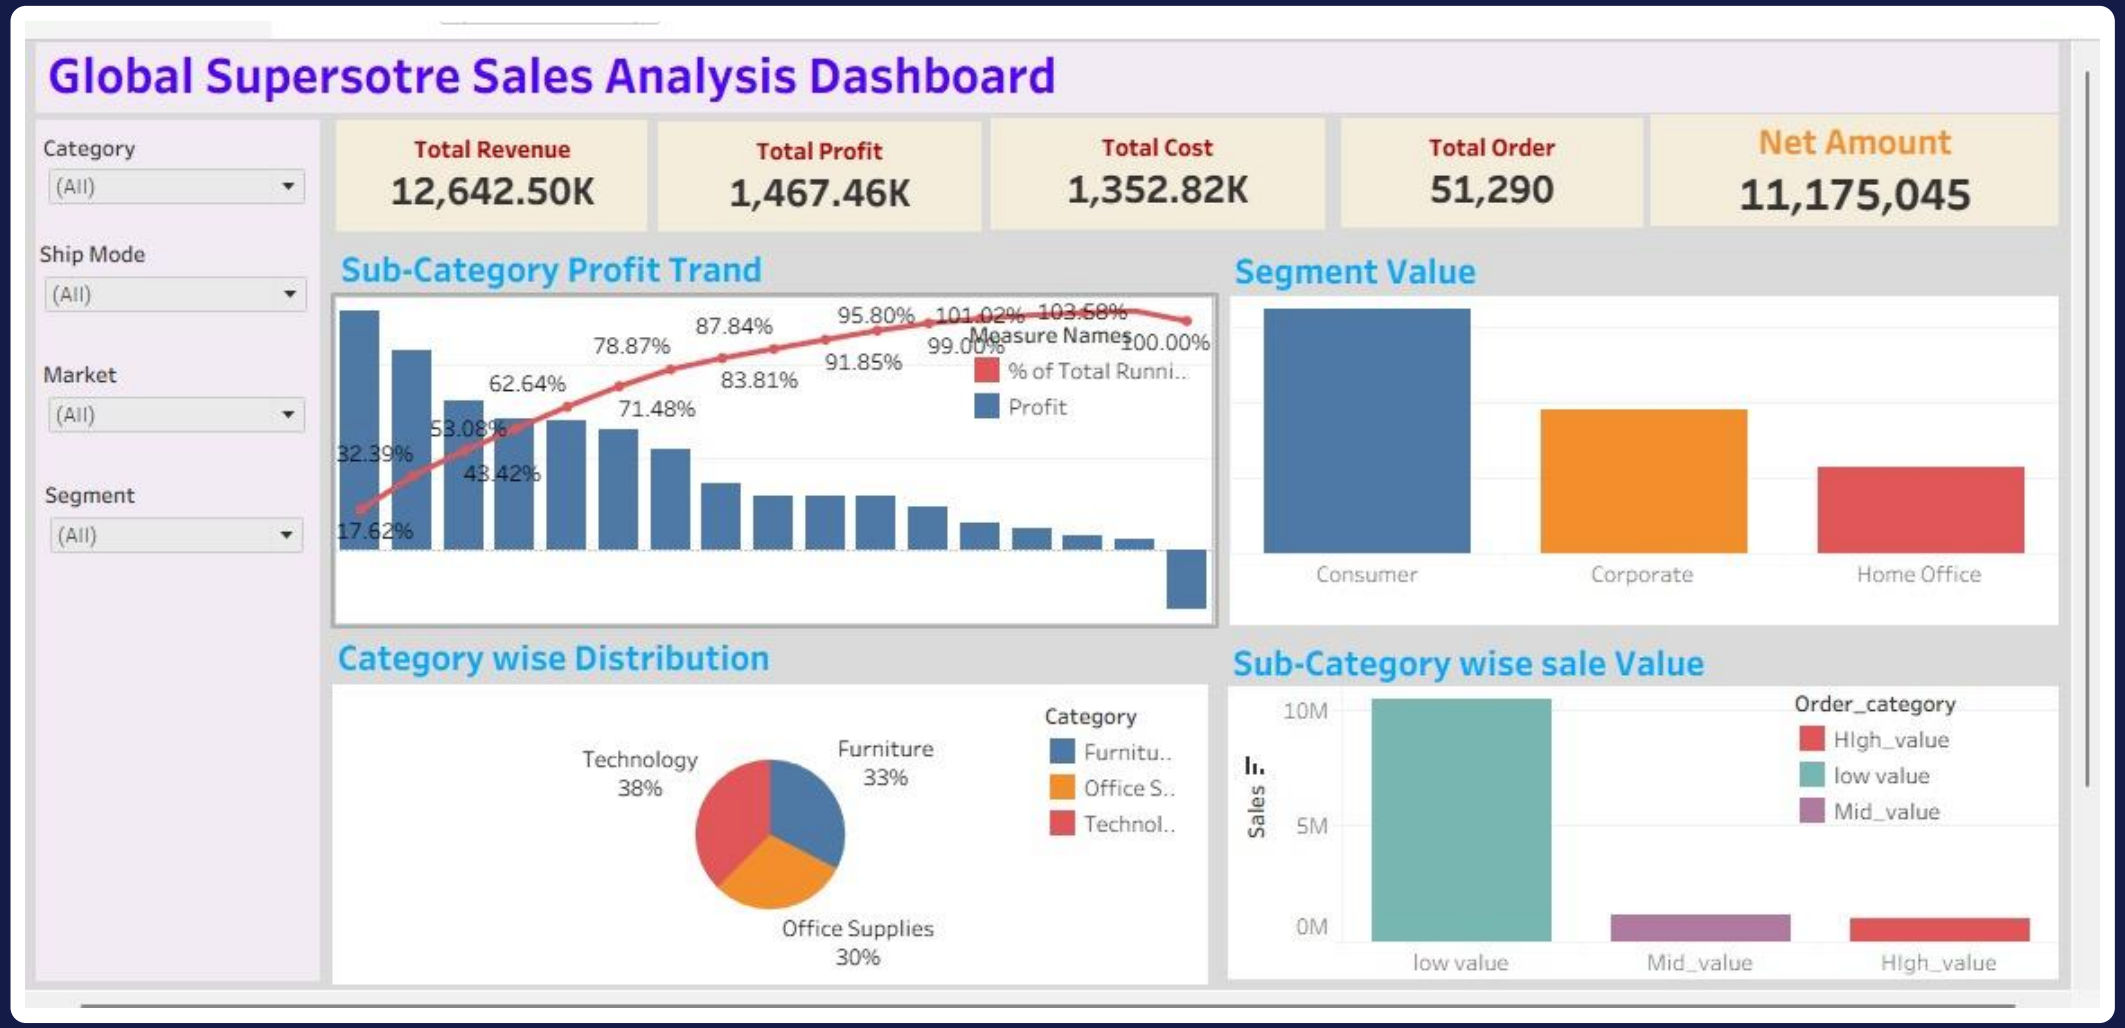

This project demonstrates a broad range of Tableau's analytical and design capabilities.

- ✓ Worksheets
- ✓ Dashboards
- ✓ Calculated Fields
- ✓ Parameters
- ✓ Filters
- ✓ Dashboard Actions
- ✓ KPI Cards
- ✓ Bar Charts
- ✓ Pie Chart
- ✓ Pareto Chart
- ✓ Sorting
- ✓ Highlight Actions

KPI Cards

TOTAL REVENUE	TOTAL PROFIT	TOTAL COST	TOTAL ORDERS	NET AMOUNT
12.64M	1.47M	1.35M	51,290	11.18M
Total sales revenue generated	Overall business profit	Total operational cost	Total customer orders	Final revenue after adjustments

The Complete Dashboard

Built in Tableau · Filters: Category, Ship Mode, Market, Segment

Dashboard Visualizations

Sub-Category Profit Trend (Pareto Chart)

Displays profit by sub-category with cumulative percentage — helps identify which sub-categories drive most of total profit (80/20 principle).

Segment Value

Compares sales across Consumer, Corporate, and Home Office to reveal which segment contributes the highest revenue.

Category-wise Distribution

Shows the sales contribution share of Technology, Furniture, and Office Supplies categories.

Sub-Category Sales Value

Displays sales by order-value groups, supporting order analysis and sales planning.

Interactive Filters

Users can filter the dashboard by four dimensions, enabling detailed and interactive analysis of business performance.

Category

Technology, Furniture, Office Supplies

Ship Mode

Shipping method used per order

Market

Geographic sales region

Segment

Consumer, Corporate, Home Office

Key Insights

- ✓ Total Revenue exceeds 12.64 Million
- ✓ Total Profit is approximately 1.47 Million
- ✓ More than 51,000 orders were analyzed
- ✓ The Consumer segment generates the highest sales
- ✓ Technology contributes the largest share of category revenue
- ✓ A small number of sub-categories drive most of total profit (Pareto analysis)
- ✓ Interactive filters allow exploration across business dimensions

Business Recommendations

1. Focus on high-profit sub-categories to maximize returns
2. Increase marketing efforts toward the Consumer segment
3. Optimize pricing and costs in low-profit categories
4. Review shipping methods to improve operational efficiency
5. Monitor market performance regularly using dashboard filters

Challenges & Future Scope

Challenges Faced

- Cleaning a large retail dataset
- Creating accurate calculated fields
- Designing an effective Pareto chart
- Balancing multiple visuals in one dashboard
- Ensuring filter interactions remained responsive

Future Improvements

- **Monthly Sales Forecasting**
- **Customer Lifetime Value Analysis**
- **Geographic Sales Maps**
- **Profit Margin KPIs**
- **Drill-down Dashboards**
- **Dynamic Tooltips**
- **Story Points**
- **Customer Retention Analysis**

Thank You

Global Superstore Sales Analysis Dashboard — built in Tableau to turn raw retail data into clear, actionable business insight.
